

HYDROFORCE

DETERGENT TO PREPARE FLOOR WAXES-FINISHES-POLISHES FOR RECOAT.

Specially formulated detergent to prepare old floor wax for recoating with fresh new coat. Concentrated product needs to be diluted with at least 10 parts of water. Easy to use, environment friendly, low odor. **Perfect for areas that cannot be shut down.** Use at hospitals, schools, grocery stores, on residential floors, and health institutions.

priced by the gallon. Packaged in 1-gallon or 5-gallon containers.

HYDROFORCE is the key to success in the "scrub and recoat" process. **Apply with a mop. Delivers a clean, partially stripped floor ready to use. Removes discoloration along with trapped dirt and grime. Conserves the cleanest, the good part of existing floor polish rather than stripping the whole floor.** Better for the budget and the environment rather than a complete strip. Pleasant to use, low odor, less slippery, perfect for areas that cannot be shut down.

- Specially formulated detergent for scrub and recoat process for floor finishes.
- **Easy to use, Easy to spread, Low odor, Less slippery, perfect for areas that cannot be shut down.**
