

MI-2

STRIPS/REMOVES FLOOR POLISH FLOOR WAX WITHOUT PROBLEMS OF HIGH PH.

MI-2 is a super concentrated floor wax-polish-sealer-finish remover, stripper formulated that is three times as concentrated than conventional strippers. It can be diluted with 30 parts of water, but also needs to be handled extremely carefully and by experienced, trained personnel only.

Dilutes with COLD WATER ONLY but does not have the PH and other corrosive properties of conventional high caustic-based strippers. **Has relatively low odor, creates very little foam, spreads uniformly on the floor without "alligatoring" or "retracting"**. Qualifies for LEED credit.

- **Specially formulated super concentrated floor wax, floor polish stripper.**
- Easy to use, Low odor, can be diluted by 30 parts of water and still be effective.
- Low foam dilutes with COLD WATER ONLY, spreads evenly on the floor.
- **Does NOT have HIGH PH and is less corrosive than similar super concentrated floor strippers.**
- Less stripper is needed at each site so transport, packaging, waste costs are minimized.
- Qualifies for LEEDS credit.
