

TERMINATOR

LESS HAZARDOUS FLOOR WAX STRIPPER. NO CAUSTICS, PHOSPHATES OR SILICATES.

Rapidly penetrates, strips, removes all metal cross-linked floor finishes, waxes, polishes or sealers. **Low odor, low foam, spreads easy.** Removes floor finishes completely with one pass, no deposits no stripper residues, requires no neutralizer. QUALIFIES for LEEDS CREDIT.

priced by the gallon. Available in 4-1-gallon case or 5-gallon buckets.

TERMINATOR is a super concentrated floor wax-polish-sealer-finish remover, stripper that is far less hazardous to the end user and property. It can be diluted with 30 parts of water, and strong enough to be used as a "mop-and-strip" for small areas without machine agitation. Classified as Corrosive Class 8 Hazmat for US DOT shipping. **Dilutes with any temperature water, has relatively low odor, creates very little foam, spreads uniformly on the floor without retracting. Does not leave any deposits or stripper residue since it contains no caustic, phosphates or silicates.** Qualifies for LEEDS credit.

- Specially formulated, super concentrated, floor finish-sealer-wax-polish stripper.
- **Contains no silicates, no phosphates or caustics, Leaves no residue on the floor.**
- Relatively less hazardous than conventional caustic strippers. Easy to use by novice, inexperienced users.
- **Easy to use, Low odor, can be diluted by 30 parts of water and still be effective.**
- Low foam, dilutes with water of any temperature, spreads evenly on the floor.
- Less stripper is needed at each site so transport, packaging, waste costs are minimized.
- No neutralizer needed. Removes floor finishes in one pass. Qualifies for LEEDS credit.
